

Course Outline

Building and Construction Trades

REVISED: August/2023

Job Title

Plumber

Career Pathway:

Residential and Commercial Construction

Industry Sector:

Building and Construction Trades

O*NET-SOC CODE:

47-2152.00

CBEDS Title:

Introduction to Building and Construction Trades

CBEDS No.:

5502

71-45-70

Plumbing/1

Credits: 10

Hours: 150

Course Description:

This competency-based course is the first in a sequence of two designed for plumbing. It provides students with project-based experiences in basic plumbing according to the Uniform Plumbing Code and the Los Angeles Plumbing Code requirements. Instruction includes an orientation, safety, resource management, trade mathematics, materials, tools, pipefitting, sanitary drainage, vent, storm water drainage systems, sizing sanitary drainage and vent piping, plumbing traps, and employability skills and resume preparation. The competencies in this course are aligned with the California High School Academic Content Standards and the California Career Technical Education Model Curriculum Standards.

Prerequisites:

Enrollment requires successful completion of the Construction Work/1 (71-35-50) course.

NOTE: For Perkins purposes this course has been designated as an **introductory/concentrator** course.

This course **cannot** be repeated once a student receives a Certificate of Completion.

COURSE OUTLINE COMPETENCY-BASED COMPONENTS

A course outline reflects the essential intent and content of the course described. Acceptable course outlines have six components. (Education Code Section 52506). Course outlines for all apportionment classes, including those in jails, state hospitals, and convalescent hospitals, contain the six required elements:

(EC 52504; 5CCR 10508 [b]; Adult Education Handbook for California [1977], Section 100)

COURSE OUTLINE COMPONENTS

LOCATION

GOALS AND PURPOSES

Cover

The educational goals or purposes of every course are clearly stated, and the class periods are devoted to instruction. The course should be broad enough in scope and should have sufficient educational worth to justify the expenditure of public funds.

The goals and purpose of a course are stated in the COURSE DESCRIPTION. Course descriptions state the major emphasis and content of a course and are written to be understandable by a prospective student.

PERFORMANCE OBJECTIVES OR COMPETENCIES

pp. 7-18

Objectives should be delineated and described in terms of measurable results for the student and include the possible ways in which the objectives contribute to the student's acquisition of skills and competencies.

Performance Objectives are sequentially listed in the COMPETENCY-BASED COMPONENTS section of the course outline. Competency Areas are units of instruction based on related competencies. Competency Statements are competency area goals that together define the framework and purpose of a course. Competencies fall on a continuum between goals and performance objectives and denote the outcome of instruction.

Competency-based instruction tells a student before instruction what skills or knowledge they will demonstrate after instruction. Competency-based education provides instruction which enables each student to attain individual goals as measured against pre-stated standards.

Competency-based instruction provides immediate and continual repetition and in competency-based education the curriculum, instruction, and assessment share common characteristics based on clearly stated competencies. Curriculum, instruction, and assessment in competency-based education are explicit, known, agreed upon, integrated, performance oriented, and adaptive.

COURSE OUTLINE COMPETENCY-BASED COMPONENTS
(continued)

COURSE OUTLINE COMPONENTS	LOCATION
INSTRUCTIONAL STRATEGIES	p. 20
<p>Instructional techniques or methods could include laboratory techniques, lecture methods, small-group discussion, grouping plans, and other strategies used in the classroom.</p> <p>Instructional strategies for this course are listed in the TEACHING STRATEGIES AND EVALUATION section of the course outline. Instructional strategies and activities for a course should be selected so that the overall teaching approach considers the instructional standards of a particular program, i.e., English as a Second Language, Programs for Adults with Disabilities.</p>	
UNITS OF STUDY, WITH APPROXIMATE HOURS ALLOTTED FOR EACH UNIT	Cover
<p>The approximate time devoted to each instructional unit on the course, as well as the total hours for the course, is indicated. The time in class is consistent with the needs of the student, and the length of the class should be so that it ensures the student will learn at an optimum level.</p> <p>Units of study, with approximate hours allotted for each unit are listed in the COMPETENCY AREA STATEMENT(S) of the course outline. The total hours of the course, including work-based learning hours (community classroom and cooperative vocational education) are listed on the cover of every CBE course outline. Each Competency Area listed within a CBE outline is assigned hours of instruction per unit.</p>	
EVALUATION PROCEDURES	p. 20
<p>The evaluation describes measurable evaluation criteria clearly within the reach of the student. The evaluation indicates anticipated improvement in performance as well as anticipated skills and competencies to be achieved.</p> <p>Evaluation procedures are detailed in the TEACHING STRATEGIES AND EVALUATION section of the course outline. Instructors monitor students' progress on a continuing basis, assessing students on attainment of objectives identified in the course outline through a variety of formal and informal tests (applied performance procedures, observations, and simulations), paper and pencil exams, and standardized tests.</p>	
REPETITION POLICY THAT PREVENTS PERPETUATION OF STUDENT ENROLLMENT	Cover
<p>After a student has completed all the objectives of the course, he or she should not be allowed to reenroll in the course. There is, therefore, a need for a statement about the conditions for possible repetition of a course to prevent perpetuation of students in a particular program for an indefinite period of time.</p>	

ACKNOWLEDGMENTS

Thanks to JOEL TREVINO for developing and editing this curriculum. Acknowledgment is also given to ERICA ROSARIO for designing the original artwork for the course covers.

CALIFORNIA CAREER TECHNICAL EDUCATION MODEL CURRICULUM STANDARDS

Building and Construction Trades Industry Sector

Knowledge and Performance Anchor Standards

1.0 Academics

Analyze and apply appropriate academic standards required for successful industry sector pathway completion leading to postsecondary education and employment. Refer to the Building and Construction Trades academic alignment matrix for identification of standards.

2.0 Communications

Acquire and accurately use Building and Construction Trades sector terminology and protocols at the career and college readiness level for communicating effectively in oral, written, and multimedia formats.

3.0 Career Planning and Management

Integrate multiple sources of career information from diverse formats to make informed career decisions, solve problems, and manage personal career plans.

4.0 Technology

Use existing and emerging technology to investigate, research, and produce products and services, including new information, as required in the Building and Construction Trades sector workplace environment.

5.0 Problem Solving and Critical Thinking

Conduct short, as well as more sustained, research to create alternative solutions to answer a question or solve a problem unique to the Building and Construction Trades sector using critical and creative thinking, logical reasoning, analysis, inquiry, and problem-solving techniques.

6.0 Health and Safety

Demonstrate health and safety procedures, regulations, and personal health practices and determine the meaning of symbols, key terms, and domain-specific words and phrases as related to the Building and Construction Trades sector workplace environment.

7.0 Responsibility and Flexibility

Initiate, and participate in, a range of collaborations demonstrating behaviors that reflect personal and professional responsibility, flexibility, and respect in the Building and Construction Trades sector workplace environment and community settings.

8.0 Ethics and Legal Responsibilities

Practice professional, ethical, and legal behavior, responding thoughtfully to diverse perspectives and resolving contradictions, when possible, consistent with applicable laws, regulations, and organizational norms.

9.0 Leadership and Teamwork

Work with peers to promote divergent and creative perspectives, effective leadership, group dynamics, team and individual decision making, benefits of workforce diversity, and conflict resolution as practiced in the SkillsUSA career technical student organization.

10.0 Technical Knowledge and Skills

Apply essential technical knowledge and skills common to all pathways in the Building and Construction Trades sector, following procedures when carrying out experiments or performing technical tasks.

11.0 Demonstration and Application

Demonstrate and apply the knowledge and skills contained in the Building and Construction Trades anchor standards, pathway standards, and performance indicators in classroom, laboratory, and workplace settings, and through the SkillsUSA career technical student organizations.

Building and Construction Trades Pathway Standards

D. Residential and Commercial Construction Pathway

The Residential and Commercial Construction pathway provides learning opportunities for students interested in preparing for careers in construction and building design, performance, and sustainability. The standards focus on the manner in which residential and commercial structures are designed and built. The pathway includes instructions on the way in which these structures are built (Class B California License).

Sample occupations associated with this pathway:

- ◆ Plumber
- ◆ Electrician
- ◆ Building Inspector
- ◆ Estimator
- ◆ Carpenter

- D1.0 Recognize the impact of financial, technical, environmental, and labor trends on the past and future of the construction industry.
- D2.0 Apply the appropriate mathematical calculations used in the construction trades.
- D3.0 Interpret and apply information from technical drawings, schedules, and specifications used in the construction trades.
- D4.0 Demonstrate techniques for proper site preparation.
- D5.0 Demonstrate foundation layout techniques to include setting forms, placing reinforcements, and placing concrete according to construction drawings, specifications, and building codes.
- D6.0 Demonstrate carpentry techniques for the construction of a single-family residence.
- D7.0 Demonstrate proper installation techniques of interior finish materials and protective finishes.
- D8.0 Demonstrate the application of exterior finish materials and protective finishes in building construction.
- D9.0 Understand, integrate, and employ sustainable construction practices in the building trades.
- D10.0 Demonstrate skills necessary to complete a plumbing system in a single-family residence in accordance with accepted industry standards.
- D11.0 Demonstrate skills necessary to complete an electrical system in a single-family residence in accordance with accepted industry standards.

CBE
Competency-Based Education

COMPETENCY-BASED COMPONENTS
for the Plumbing/1 Course

COMPETENCY AREAS AND STATEMENTS	MINIMAL COMPETENCIES	STANDARDS
<p>A. ORIENTATION</p> <p>Understand, apply, and evaluate classroom and workplace policies and procedures.</p> <p>(3 hours)</p>	<ol style="list-style-type: none"> 1. Define the scope and purpose of the course. 2. Define classroom policies and procedures. 3. Discuss and demonstrate Schoology and basic computer skills. 4. Discuss, identify, research, and draw conclusions on the different career paths, occupations, employment outlook, career advancements in the Building and Construction Trades industry sector, which have an impact on the plumbing field. 5. Define the opportunities available for promoting gender equity and the representation of non-traditional populations in plumbing. 6. Explain and recognize the importance of ethics, teamwork, respecting individual and cultural differences and diversity in the workplace. 7. Define the following legislative mandates, historical trends, and their impact on the plumbing trade: <ol style="list-style-type: none"> a. Uniform Building Codes b. Americans with Disabilities Act c. Uniform Plumbing Code d. Los Angeles County Plumbing Code 	<p>Career Ready Practice: 1, 2, 3, 4, 5, 8, 9, 10, 11</p> <p>CTE Anchor: Academics: 1.0 Communications: 2.1, 2.3 Career Planning and Management: 3.3, 3.4, 3.5, 3.6, 3.9 Technology: 4.1, 4.2, 4.5 Problem Solving and Critical Thinking: 5.4 Ethics and Legal Responsibilities: 8.2, 8.4 Leadership and Teamwork: 9.3, 9.4, 9.6 Technical Knowledge and Skills: 10.1, 10.2 Demonstration and Application 11.1, 11.2</p> <p>CTE Pathway: D1.1</p>
<p>B. SAFETY</p> <p>Understand safety procedures and techniques in the plumbing field.</p>	<ol style="list-style-type: none"> 1. Discuss classroom and workplace first aid and emergency procedures. 2. Define and discuss the California Occupational Safety and Health Administration (Cal/OSHA) workplace requirements for plumbers. 3. Discuss the impact of Environmental Protection Agency (EPA) legislation on Building Construction and Trades industry sector 	<p>Career Ready Practice: 1, 2, 10, 12</p>

COMPETENCY AREAS AND STATEMENTS	MINIMAL COMPETENCIES	STANDARDS
(12 hours)	<p>practices in protecting and preserving the environment.</p> <ol style="list-style-type: none"> 4. Discuss the use of the Safety Data Sheet (SDS) as it applies to the plumbing trade. 5. Discuss how each of the following insures a safe workplace: <ol style="list-style-type: none"> a. employees' rights as they apply to job safety b. employees' obligations as they apply to safety c. safety laws applying to tools and equipment 6. Define ergonomics and demonstrate sound ergonomic practices. 7. Describe and demonstrate the standards regarding proper use of protective: <ol style="list-style-type: none"> a. clothing and gloves in a plumbing field b. respiratory gear in a plumbing field c. eye gear in a plumbing field d. ventilation in a plumbing field 8. Set up a workshop to avoid potential health concerns and safety hazards to include: <ol style="list-style-type: none"> a. practicing personal safety when lifting, bending, or moving equipment and supplies b. handling, storage, and disposal of chemicals and hazardous materials c. preventing and responding to work-related accidents or injuries to include demonstrating an understanding of ergonomics d. maintaining a safe and healthful working environment and report hazards found to the instructor e. proper care and use and safe use of hand, portable and stationery power tools 9. Pass the safety test with 100% accuracy. 	<p>CTE Anchor: Academics: 1.0 Communications: 2.1, 2.3 Health and Safety: 6.1, 6.2, 6.3, 6.4, 6.5, 6.6, 6.7, 6.8, 6.9, 6.10, 6.11, 6.12 Technical Knowledge and Skills: 10.1, 10.2, 10.5 Demonstration and Application: 11.1</p> <p>CTE Pathway: D1.2</p>
<p>C. RESOURCE MANAGEMENT</p> <p>Understand, apply, and evaluate resource management principles and techniques in the plumbing business.</p> <p>(1 hour)</p>	<ol style="list-style-type: none"> 1. Define the following: <ol style="list-style-type: none"> a. resources b. management c. sustainability d. critical path method (CPM) 2. Describe and list examples of effective management of the following resources in the plumbing business: <ol style="list-style-type: none"> a. time b. materials c. personnel 3. Describe the benefits of effective resource management in the plumbing business: <ol style="list-style-type: none"> a. profitability b. sustainability c. company growth 4. Describe the economic benefits and liabilities of managing resources in an environmentally responsible way. 5. Pass a resource management assessment with an 80% score or higher. 	<p>Career Ready Practice: 1, 2, 5, 7, 12</p> <p>CTE Anchor: Academics: 1.0 Communications: 2.1, 2.3 Responsibility and Flexibility: 7.1, 7.3, 7.4, 7.6 Technical Knowledge and Skills: 10.1</p> <p>CTE Pathway: D9.2</p>

COMPETENCY AREAS AND STATEMENTS	MINIMAL COMPETENCIES	STANDARDS
<p>D. TRADE MATHEMATICS</p> <p>Understand, apply, and evaluate the mathematical requirements in the workplace.</p> <p>(12 hours)</p>	<ol style="list-style-type: none"> 1. Describe the practical applications of math in plumbing. 2. Describe, clarify questions, and demonstrate problem-solving techniques involving: <ol style="list-style-type: none"> a. whole number problems, using arithmetic operations (addition, subtraction, multiplication, and division) b. various fraction problems using arithmetic operations c. various decimal problems using addition, subtraction, multiplication, and division d. changing fractions to decimals e. changing decimals to fraction 3. Describe the English system of measuring length and weight. 4. Describe the English system of measuring volume or capacity to include PI for area of circle. 5. Describe and demonstrate English and metric problem-solving techniques for various measuring problems using arithmetic operations and various types of reasoning to make informed decisions. 6. Describe and demonstrate English and metric measuring techniques of objects by using tools common to the trade. 7. Express metric units in ascending and descending powers of ten. 8. Convert the English numbering system to metric system. 9. Convert metric system to English numbering system. 10. Calculate square roots of English numbers. 11. Describe and demonstrate problem-solving techniques and identify barriers: <ol style="list-style-type: none"> a. geometric problems b. algebraic problems c. percentages d. interpreting graphs e. using a calculator 12. Pass a trade mathematic assessment with an 80% score or higher. 	<p>Career Ready Practice: 1, 2, 5, 10</p> <p>CTE Anchor: Academics: 1.0 Communications: 2.1, 2.2, 2.3 Problem Solving and Critical Thinking: 5.1, 5.2, 5.4 Technical Knowledge and Skills: 10.1 Demonstration and Application: 11.1</p> <p>CTE Pathway: D2.1, D2.2, D2.3</p>
<p>E. MATERIALS</p> <p>Understand, apply, and evaluate the safe use, maintenance, and storage of plumbing materials.</p>	<ol style="list-style-type: none"> 1. Define, identify, and describe the features and functions of the following: <ol style="list-style-type: none"> a. piping/ tubing b. schedule 20, 40, 80 pipe c. fittings d. valves e. plastic tubing and joints 2. Describe the meaning of different pipe colors for plastic pipes. 3. Describe and demonstrate the safe use, maintenance, and storage of different types of plastic pipe. 4. Define and describe the purpose of the following types of plastic fittings: <ol style="list-style-type: none"> a. elbow b. tee c. coupling d. cap 	<p>Career Ready Practice: 1, 2, 9, 10, 12</p> <p>CTE Anchor: Academics: 1.0 Communications: 2.1, 2.3 Problem Solving & Critical Thinking: 5.1, 5.4 Health and Safety: 6.2, 6.4</p>

	<ol style="list-style-type: none"> 13. Describe the responsibility and importance of selecting the proper fittings for changes in direction. 14. Sketch a DWV system, showing the proper fittings, where there is a change: <ol style="list-style-type: none"> a. from the horizontal to the vertical b. from the horizontal to the horizontal 15. Describe the proper locations for cleanouts. 16. Describe the current Uniform Plumbing Code and Los Angeles Plumbing Code procedures for sanitary drainage piping regarding: <ol style="list-style-type: none"> a. materials b. DFU values c. fixture unit equivalents d. size of piping e. changes in direction of flow f. cleanouts g. grade of horizontal piping h. gravity requirement 17. Define the following terms that relate to sanitary drainage piping venting: <ol style="list-style-type: none"> a. vent pipes b. atmospheric pressure (minus and plus) c. vacuum d. water seal trap e. trap seal loss f. siphonage g. back pressure 18. Identify and describe the features and functions of vent pipes. 19. Describe the importance of a fully functioning vent system. 20. Describe the relationship between atmospheric pressure and the drainage system. 21. Define and describe the relationship between trap seal loss, siphonage, and back pressure. 22. Describe causes of retarded flow in the drainage system. 23. Describe the effect of sewer gas on the drainage system and the method used to reduce this effect. 24. Describe the function of the stack vent and the vent stack. 25. Define developed length of a vent pipe. 26. Describe how vent pipes are sized. 27. Describe the sizing and length of vent stacks based on DFU and soil or waste stack size. 28. Describe the sizing and length of individual, branch, circuit, and stack vents based on DFU. 29. Define and describe the function and procedure for installing a stack terminal. 30. Define and describe the importance of proper trap-to-vent distance. 31. Define and describe the function of individual vent, common vent, branch vent, and wet vent. 32. Sketch and demonstrate the set-up of a combination vent piping system. 	

COMPETENCY AREAS AND STATEMENTS	MINIMAL COMPETENCIES	STANDARDS
(27 hours)	<ol style="list-style-type: none"> 33. Define and describe the function of the storm water drainage system versus the sewage system. 34. Compare the common features of the storm water drainage system and the sanitary drainage system. 35. Define and describe the function and installation procedures for roof drains and storm drain traps. 36. Define and describe the relationship between projected roof area and rainwater leader. 37. Describe the sizing and length of horizontal storm drain size based on drain diameter and roof slope. 38. Describe green and sustainable practices in constructing storm water drainage systems. 39. Sketch and demonstrate the set-up of a storm water drainage system including storm drains, rainwater leaders, and storm drain traps. 40. Understand the importance of time management in installing an efficient drainage system. 41. Describe the current Uniform Plumbing Code and Los Angeles Plumbing Code procedures for vents and storm drainage. 42. Pass a DWV systems assessment with an 80% score or higher. 	
<p>I. SIZING SANITARY DRAINAGE AND VENT PIPING</p> <p>Understand and apply the construction of sanitary drainage, vent, and storm water drainage systems for residential and commercial buildings.</p>	<ol style="list-style-type: none"> 1. Describe the current Uniform Plumbing Code and Los Angeles Plumbing Code procedures for fixture connections and joints and connections for sanitary drainage systems. 2. Review the current Uniform Plumbing Code and Los Angeles Plumbing Code procedures for sanitary drainage piping and vents. 3. Review the symbols used in piping drawings. 4. Identify and describe the features and functions of a residential dwelling. 5. Perform the following for a residential dwelling: <ol style="list-style-type: none"> a. describe the typical type and number of plumbing fixtures b. form a team to sketch and size the drainage and vent requirements, including a bathroom stack with individually vented fixtures c. create a materials list d. demonstrate drain and vent assembly procedures 6. Perform the following for a residence: <ol style="list-style-type: none"> a. describe the typical type and number of plumbing fixtures b. sketch and size the drainage and vent requirements, including a bathroom stack with individually vented fixtures and interpret information c. create a materials list d. demonstrate drain and vent assembly procedures 7. Pass a sizing sanitary drainage and vent piping assessment with an 80% score or higher. 	<p>Career Ready Practice: 1, 2, 5, 8, 9, 10</p> <p>CTE Anchor: Academics: 1.0 Communications: 2.1, 2.3 Problem Solving and Critical Thinking: 5.1, 5.4 Ethics and Legal Responsibilities: 8.2 Leadership and Teamwork: 9.3 Technical Knowledge and Skills: 10.2, 10.3 Demonstration and Application: 11.1</p> <p>CTE Pathway: D3.1, D3.2, D3.3, D3.4, D3.5, D3.7,</p>

COMPETENCY CHECKLIST

TEACHING STRATEGIES and EVALUATION

METHODS AND PROCEDURES

- A. Lectures and discussions
- B. Multimedia presentations
- C. Demonstrations and participation
- D. Individualized instruction
- E. Peer teaching
- F. Role-playing
- G. Guest speakers
- H. Field trips and field study experiences
- I. Projects

EVALUATION

SECTION A – Orientation – Pass all assignments and exams with a minimum score of 80% or higher.

SECTION B – Safety – Pass the safety test with 100% accuracy.

SECTION C – Resource Management – Pass all assignments and exams with a minimum score of 80% or higher.

SECTION D – Trade Mathematics – Pass all assignments and exams with a minimum score of 80% or higher.

SECTION E – Materials – Pass all assignments and exams with a minimum score of 80% or higher.

SECTION F – Tools – Pass all assignments and exams with a minimum score of 80% or higher.

SECTION G – Pipefitting – Pass all assignments and exams with a minimum score of 80% or higher.

SECTION H – Sanitary Drainage, Vent, and Storm Water Drainage (DWV) Systems – Pass all assignments and exams with a minimum score of 80% or higher.

SECTION I – Sizing Sanitary Drainage and Vent Piping – Pass all assignments and exams with a minimum score of 80% or higher.

SECTION J – Plumbing Traps – Pass all assignments and exams with a minimum score of 80% or higher.

SECTION K – Employability Skills and Resume Preparation – Pass all assignments and exams with a minimum score of 80% or higher.

Standards for Career Ready Practice

1. Apply appropriate technical skills and academic knowledge.

Career-ready individuals readily access and use the knowledge and skills acquired through experience and education. They make connections between abstract concepts with real-world applications and recognize the value of academic preparation for solving problems, communicating with others, calculating measures, and performing other work-related practices.

2. Communicate clearly, effectively, and with reason.

Career-ready individuals communicate thoughts, ideas, and action plans with clarity, using written, verbal, electronic, and/or visual methods. They are skilled at interacting with others: they are active listeners who speak clearly and with purpose, and they are comfortable with terminology that is common to workplace environments. Career-ready individuals consider the audience for their communication and prepare accordingly to ensure the desired outcome.

3. Develop an education and career plan aligned with personal goals.

Career-ready individuals take personal ownership of their educational and career goals and manage their individual plan to attain these goals. They recognize the value of each step in the educational and experiential process, and they understand that all career paths require ongoing education and experience to adapt to practices, procedures, and expectations of an ever-changing work environment. They seek counselors, mentors, and other experts to assist in the planning and execution of education and career plans.

4. Apply technology to enhance productivity.

Career-ready individuals find and maximize the productive value of existing and new technology to accomplish workplace tasks and solve workplace problems. They are flexible and adaptive in acquiring and using new technology. They understand the inherent risks—personal and organizational—of technology applications, and they take actions to prevent or mitigate these risks.

5. Utilize critical thinking to make sense of problems and persevere in solving them.

Career-ready individuals recognize problems in the workplace, understand the nature of the problems, and devise effective plans to solve the problems. They thoughtfully investigate the root cause of a problem prior to introducing solutions. They carefully consider options to solve a problem and, once agreed upon, follow through to ensure the problem is resolved.

6. Practice personal health and understand financial literacy.

Career-ready individuals understand the relationship between personal health and workplace performance. They contribute to their personal well-being through a healthy diet, regular exercise, and mental health activities. Career-ready individuals also understand that financial literacy leads to a secure future that enables career success.

7. Act as a responsible citizen in the workplace and the community.

Career-ready individuals understand the obligations and responsibilities of being a member of a community and demonstrate this understanding every day through their interactions with others. They are aware of the impacts of their decisions on others and the environment around them, and they think about the short-term and long-term consequences of their actions. They are reliable and consistent in going beyond minimum expectations and in participating in activities that serve the greater good.

8. Model integrity, ethical leadership, and effective management.

Career-ready individuals consistently act in ways that align with personal and community-held ideals and principles. They employ ethical behaviors and actions that positively influence others. They have a clear understanding of integrity and act on this understanding in every decision. They use a variety of means to positively impact the direction and actions of a team or organization, and they recognize the short-term and long-term effects that management's actions and attitudes can have on productivity, morale, and organizational culture.

9. Work productively in teams while integrating cultural and global competence.

Career-ready individuals contribute positively to every team, as both team leaders and team members. To avoid barriers to productive and positive interaction, they apply an awareness of cultural differences. They interact effectively and sensitively with all members of the team and find ways to increase the engagement and contribution of other members.

10. Demonstrate creativity and innovation.

Career-ready individuals recommend ideas that solve problems in new and different ways and contribute to the improvement of the organization. They consider unconventional ideas and suggestions by others as solutions to issues, tasks, or problems. They discern which ideas and suggestions may have the greatest value. They seek new methods, practices, and ideas from a variety of sources and apply those ideas to their own workplace practices.

11. Employ valid and reliable research strategies.

Career-ready individuals employ research practices to plan and carry out investigations, create solutions, and keep abreast of the most current findings related to workplace environments and practices. They use a reliable research process to search for new information and confirm the validity of sources when considering the use and adoption of external information or practices.

12. Understand the environmental, societal, and economic impacts of decisions.

Career-ready individuals understand the interrelated nature of their actions and regularly make decisions that positively impact other people, organizations, the workplace, and the environment. They are aware of and utilize new technologies, understandings, procedures, and materials and adhere to regulations affecting the nature of their work. They are cognizant of impacts on the social condition, environment, workplace, and profitability of the organization.
